About This Software

StageX helps you to create scene of the future movie with simple and initiative tools because it is based on the principle of instinct learning. You just start to create your own movie as if you were on a set, and it doesn't matter what exactly you make: a cartoon or a movie.

Share the result with colleagues and stakeholders with the help of export previz tool. Get your movie or fbx format scene out there, then sit back and take all the credit.

Get high-fidelity in under 5 minutes. Upload your 3d files and add animation, lighting, and VFX to transform your static scene into full animation movie.

Title: StageX
Genre: Animation & Modeling, Video Production, Early Access
Developer:
UnitedRealityLab
Publisher:
UnitedRealityLab
Release Date: 13 Jun, 2017

b4d347fde0

Minimum:

Requires a 64-bit processor and operating system

OS: Windows 7 SP1, Windows 8.1 or later, Windows 10

Processor: CPU: Intel i5-4590, AMD FX 8350 equivalent or better

Memory: 4 GB RAM

Graphics: Nvidia GeForce GTX 970, AMD Radeon R9 290 equivalent or better

Storage: 500 MB available space

Sound Card: N/A

I wanted so badly to recommend this game. It's got a really cool concept and set up, the world design and music are fantastic, but there's a few significant drawbacks:

- Really limited interface and front-end options - no option to adjust mouse sensitivity or reverse y-axis
- Movement feels like it's frequently having trouble getting around terrain, even if you don't get completely stuck
- Very short (play through for me was 25 minutes, and I took my time)

Devs, if you're listening, the reviews are full of (mostly) wonderful advice to improve this game. With a little more polish and a lower price, this would be recommended for sure. Please keep creating because you're so close to making a hit!. A lot of VN's of the "ecchi" kind have great visuals, but skimp on the plot (story plot mind you), but this VN has both pleasing visuals and a deep, engrossing story. Nothing against the Sakura games (ive played them all, and loved them dearly), but its nice to have a good plot, with the plot. Highly recommend any fan of VN's to pick this up.. Pretty fun. I played for a solid two hours before I got a bit bored/got to what felt like I'd experienced most of what the game had to offer. Definitely has a great amount of trippy stuff, nice colors, and nice effects, though they are a bit far in between (as are some of the random events) if you're expecting one after another visuals. There's a library, which I feel adds a good amount of background to the game, though I wish that effort was placed into more random events (even if the event didn't do much, it would be nice to just change the pace a bit. Loved the satellites with old radio/shows.

Lots of cool effects, for example flying into gasses/waters floating around which definitely seems cool. and is great for the first time, though I got a little tired, but I was on my 3rd hour. I think if you could rotate the camera that would definitely be a fun implementation, though I'm not sure how hard that'd be, but it would make flying through the asteroids much cooler (this was one of my favorite features)

There's a slider you have to do to translate with aliens, I'd say it got a little tedious. All in all, fun game. Hopefully the beta has more events, because I feel like those are the bread and butter of space games. Also, maybe a sandbox mode much like the chillout where you can change your speed to go very very fast, how many objects (such as the trippy/cool visual ones like gas clouds, toggle effects such as bizzarro or the visual effect I can only call drunken? (It's like a wavy thing).. This game is okay. The gameplay is a blast and destroying ships is rewarding. The story sucks and the campaign offers some fun, but where the game shines is the Multiplayer. Unfortunatley GameSpy's demise left this game without multiplayer, but you can play through Gameranger. Before you play via Gameranger, you have to download a no cd crack and replace it with the .exe file. Site: <http://www.battlestations.eu/index.php/en/downloads/category/1-patches>.

кровь-кишки-стуженка! =)

. i dont even know where to begin here.

so basically take all the greats of cheesy gay adult film, then... turn them into waifus? I think? I'm still not sure myself but holy hell this is my favorite game ever

Extremely fun. The game is very addictive, although I have only played for a short while I think I can still review it.
The clan system is not a very well done unless your very active over steam or a tacial Russian community or something???
The opening is short and sweet but tells u all u need to know
I would highly reccomend this game. Thy sword is a game that is perfection in a confined space. Retro to the bone and great fun to play. Highly recommended

- Fun and compelling gameplay
- Satisfying action\combat
- Well designed pixel art visuals
- Awesome music
- Rogue lite elements
- Random and unexpected events

- Unlockable playable characters

Thy Sword was covered by myself and my friend ToborPrime in our Game development\industry podcast - <https://www.youtube.com/watch?v=B-se22geVuk&t>. A fun turn-based rpg game with a good story to suck you in. Yes the graphics are bad but the hours you can put in is worth it from leveling up, killing ogres/people/etc. and completing quests. Its got a classic feel to it. Luckily for me I'm into these type of games.. What a wonderful game! A lot of fun for a plant fanatic like me. It's still a little buggy (I clicked to go back while the camera was still moving towards the shelf of pots, and it got stuck there in mid-air), but that's to be expected from a newly-released game.

The concept is very nice and very well executed, in my opinion. With this and Viridi in my game library, my digital plant life is complete!. Developers launch an update to the game that deletes all my progress. Talk about doing a poor job.. I can't wait to get the English version, here is an idea make a DLC that adds voice acting to the full game to better enjoy the game for people that do enough reading at work or school, charge money just turn this game into a talky. Please stop making missions with time lines it feels like a job which is bs, and make NPC's that have quests stand out not to waste time.. dont do it!!! save your money!!! its only singleplayer. Its a trap!!!
